Company Environmental Procedure

JMC Environmental Policy

The policy of JMC Mechanical Electrical & Air Conditioning Ltd is to actively endorse the objectives of International Chamber of Commerce (ICC) charter for sustainable development; inasmuch as JMC Mechanical Electrical & Air Conditioning Ltd will endeavour to maintain and improve its policies and performance, by integrating environmental management with commercial operations.

The main objectives of the policy are;-

- 1) To use wherever practicable, earth resources which can naturally be replaced in a lifetime.
- 2) To prevent pollution at source, wherever possible. To carefully and safely dispose of redundant materials by recycling whenever possible or controlled disposal.
- 3) To conserve natural resources through energy management, recycling, and other environmentally sound practices.
- 4) To monitor and control the performance JMC's staff and sub-contractors so that government legislation & codes of practice are complied with.

Reporting of Environmental Incidents Reporting and Investigation

All incidents of contravention of JMCs Environmental Policy, to actively endorse the objectives of the International Chamber of Commerce's charter for sustainable development; must be immediately reported to a JMC supervisor.

The supervisor's investigations will determine the nature of any failure to comply with prevailing government legislation and codes of practice, in particular the Environment Protection Act 1990, Environment Act 1995, the Water Industry Act 1991 and the Clean Air Act 1993.

Where necessary, outside agencies may be sub-contracted to provide professional assistance, and in every case a report given to the Managing Director.

General disposal of industrial waste must be at licensed controlled tips.
